## Schedule An Inspection

*Planning on purchasing a Mercedes, how about selling one?*

### Before You Buy

A Pre-Purchase Used Car Inspection can help to protect you, the consumer, from unscrupulous dealers and individuals selling vehicles with: Frame Damage, Body Damage, Interior Damage, Paint Work, Mechanical Problems, Electrical Problems, Lack of Maintenance, Leaks, and many other problems and issues our Technicians see everyday.

The Mercedes Garage pre-inspection can protect the consumer from buying someone else's problems. We will give you a written unbiased report identifying any problems that we find at the time of the inspection. Today many people are mistaken in thinking that a certified vehicle or a history report is a substitute for a Pre-Purchase inspection. A history report is not always fully accurate and the history of a vehicle can be changed, a history report can be a useful tool but it is not a substitute for an inspection. Certified vehicles are checked by the dealers own biased service department and the Technicians that check over the vehicles are not trained to find paint work and frame damage.

The Mercedes Garage ASE Master Certified technicians will perform a complete Bumper-To-Bumper inspection before you buy. We are equipped with all the diagnostic equipment needed to perform the inspection. The technician will give you a written, unbiased report based on the condition of the vehicle. We can also give you a written appraisal of the current market value of the vehicle. With our inspection, you know the condition of the vehicle before you buy. A complete inspection arms you with the knowledge to make an educated buy. Using our service should be one of the steps you take before buying a used Mercedes. After our inspection you can be confident in buying a car or even glad you didn't buy it.
